

María Benito

14/07/1995

Junior web developer with vocational training and internship experience in web development (Angular 19, TypeScript). I also have an advanced level of English and a background as an IT technician, which has provided me with skills in teamwork, problem-solving, and technical documentation.

Experience as a Developer

FRONTEND DEVELOPER

Timestamp, Pozuelo de Alarcón, Madrid (hybrid) Internship contract | march - june 2025

- Development of components and views in Angular 19 with TypeScript for a Telefónica project (*Empleo* app), based on high-fidelity prototypes designed in Figma.
- Integration of RESTful services by consuming backend endpoints implemented with Node.js and Express.
- Technologies used: VSCode, SourceTree, Bitbucket, Git.
- Final project and documentation: Pokedex App—a set of exercises consuming the Pokémon API, similar in nature to the functionality in the actual Telefónica project. Available on GitHub.
